Welcome to Data Visualization and Dashboards with Excel and Cognos!

We're excited that you've decided to take this step in your learning journey. Over the next **4** weeks in the course, you will learn:

- The first steps in the process of data visualizations with spreadsheets
- How to create charts to present a clear picture of your data
- How to create a simple, but interactive dashboard using spreadsheets and Cognos Analytics

If you are having any issues with the course content or require clarifications, please go through the [course discussion forums](#) and feel free to leave a comment there.

Congrats on taking the first step toward developing in-demand skills and advancing your learning!

Cheers,

The IBM Team
